

Critical Reading

Here are some websites that can help you develop a critical reading of the information found on the Web:

Biblio-Santé website (Health-Library)

The website is coordinated by the Quebec Public Library Association and offers a downloadable document entitled «[Parkinson's Disease](#)» updated each year. This booklet offers selected information including a resource directory, reading suggestions as well as films and documentaries.

To develop a critical reading in connection with the multitude of websites available, it is suggested that you consider the reputation of the author(s) from the source of information as well as the quality of this source of information.

Biblio-Santé website, Parkinson's disease:

Online Health Information Aid

In a simplified way, the Online Health Information (OHIA) aid team, made up of graduate students, librarians, and researchers, offers you some tips and questions to improve skills and confidence in finding trustworthy health information online.

This website offers some tips for checking whether a source of information is credible. We invite you to consider the resources on searching, evaluating, and using online health information. Easy to follow tutorials are also available and will help you. Keep an eye out!
